To,

The Principal,
Arts, Commerce and Science College,
Satral. Tal- Rahuri, Dist- Ahmednagar.

Subject: Permission for field visit to a Vermiculture unit and Sericulture unit.

Respected Sir,

With reference to above subject the Department of Zoology wants to arrange a field visit to a well-established vermiculture unit and sericulture unit on 26th April, 2022. The vermiculture unit is situated at. Durgapur, Tal- Rahata, Dist- Ahmednagar and sericulture unit at. Chandrapur, Tal- Rahata, Dist- Ahmednagar. units are well known for vermicomposting and production of raw silk. This visit will involve the 48 students of S.Y. B.Sc. This tour will provide a practical based knowledge about rearing of vermiculture and sericulture to the students. So, please allow us to arrange the same.

Thank you,

Yours Sincerely,

Dr. Ram S. Tambe

A Field Visit to "VERMICOMPOSTING AND SERICULTURE UNIT"

Introduction:

A field visit was organised by Department of Zoology, Arts, Commerce and Science College, Satral in collaboration with Anand Agri Biotech, Durgapur Tal- Rahata, Dist- Ahmednagar and sericulture unit at Chandrapur (Ghule Patil farm) for the students. The activity was organized on 26th April, 2022 under the MoU signed between Department of Zoology and Anand Agri Biotech, Durgapur dated 22/02/2022.

Field visit is one of the best tools that we can for students to give hands on experience in the lesson and enhance their life skills. So, to increase their knowledge about silkworm (related to their lesson fiber to fabric) and to develop their skill.

Objectives:

- To create awareness among students about benefits of organic farming.
- To explore propagation of vermicompost among students for better yield of Crop.
- To develop training, skill & team work spirit among students.
- To promote the students to make their own unit.
- To demonstrate the life cycle of silk worm.
- Practical exposition of agriculture of this field of mulberry to obtain its leaves, on which silkworm caterpillar feeds.
- Observe the life cycle of *Mombyx mori*-hundreds of eggs were laid on leaves, caterpillar feeding on leaves of mulberry, cocoon collected to extract silk, adults collected in jars.
- Illustrations of equipment used in rearing silkworms.
- Cost effective methods and material required to establish sericulture.
- Application and economic importance of silk culture.

Outcome:

This field visit was of great use for students after practical knowledge they obtain. Students collected life cycle stages like, eggs, leaves, cocoon etc. understanding towards the concept and its application of sericulture was cleared to students after this visit.

Details of the Visit:

We the staff members along with students, reached the vermicomposting unit situated at Durgapur at 10 am. The unit was established in 2015-16 and successfully run by the owner **Mr. Prashat L. Pulate**. The details of the Verm technology were discussed with him. The faculty members also guided the students. The students observed various stages of development from cocoon to young and adult earthworms.

Students were trained in handling the equipment's and earthworms. The students studied the different stages in the life-cycle of earthworm. They observed the different methods of bed preparation, inoculation and separation of culture. The trainer Mr. Prashant L. Pulate explained different stages and methods of vermicomposting in details. He started the

session with interesting information about vermiculture. He explained the production technology with materials used, process of preparation and harvesting of the compost.

He focused on the fact that vermicompost has been emerging as an important source in supplementing and substituting chemical fertilizers in agriculture. Vermicompost, also known as 'farmer's friend' is used for general crops and plantation crops. It is a valuable input for sustainable agriculture and wasteland development. It is a growth promoter and helpful in providing hormones required for plant growth. There is a lot of demand for vermicompost among farmers as its use increases quality of agricultural products and its price is also cheaper. It is also used widely in pot culture and in home gardens. In addition, many government departments including agriculture, forest and horticulture buy it in bulk. Its demand has decreased over the years. Government agencies and NGOs are popularizing organic agriculture using vermicompost by organizing awareness campaigns and film show in rural and urban areas.

Students interacted with the trainer and farm-workers to know about the vermicomposting unit. They asked various questions arising in their minds. The students acquired the knowledge about species of earthworms, procurement of culture, their storage, harvesting and use of vermicompost. As many of the students are belonging to the farmers' families, they feel it as a great experience. Many of them asked about the economics of the vermiculture also. It was a good interaction session where the students clarified their doubts & some could answer his questions. Mr. Prashant Pulate was delighted with the students' response.

At 11.05 am reached the sericulture farm. There we met Mr. Ghule Patil owner of the sericulture farm. They gave a welcome to us. There we saw how the caterpillar feeding. Then students took silkworm caterpillar in their hand and excitedly discussed on their body structure. It was really a wonderful session. After that we stepped into mulberry plantation area and saw the mulberry leaves. Then Mr. Ghulepatil gave an informative lecture in 'life history of silk moth'. Finally, we thanked him for giving us an opportunity to visit her sericulture farm.

On the whole, it was very fruitful field visit for the students.

Along with the 02 teachers, 48 students from our college participated in this study visit.

Report on Nationals Voters' Day

Department of Political Science National Voters' Day on Tuesday
25 January 2022 at college premises.

Objectives

- ❖ To inculcate constitutional obligation among students.
- ❖ To create awareness among students.
- ❖ To sensitise the students about importance of voting.

Mr.E.S.Nirmal,Hesad,Dept. of Political Science introduced the objective of the programme. The purpose of the programme is to inculcate constitutional obligations and to encourage staff and students to cast their votes. The coordinator read the Voter's day pledge and helped the staff and 29 students were presented to take pledge. The programme made aware staff and students the importance of right to vote, students and staff took constitution day oath.

SOLAR ENERGY AWARENESS IN NEARBY VILLAGE AND SCHOOLS

INTRODUCTION:

The sun is continuously releasing solar radiation, some of which will eventually reach the earth. We make use of this solar energy in a number of different ways. It helps to support day to day life, can generate electricity and can even heat our water. Why solar energy is most important natural energy sources available to our earth?

1. **Solar Energy is Good for the Environment:** Unlike fossil fuels, solar energy does not produce any greenhouse gases or carbon emissions like methane, nitrous oxide, carbon dioxide, etc. Therefore, it is much better for the environment and can help to reduce the effects of climate change.
2. **The Sun is Renewable:** The Sun is renewable energy source and we can continue to use it day after day.
3. **Solar Power can Improve Energy Security:** By using more solar energy, a country can help to increase its energy security. Asian countries including India have been very successful in the large-scale rollout of solar power.
4. **The Solar Energy Industry Creates Jobs:** The solar energy industry has a potential to give large number of jobs all over the world.
5. **Solar Energy has Different Uses:** Along with electricity generation solar energy can be used for heating water, cooking, drying etc.
6. **It can Reduce your Energy Bills:** Solar energy has the potential to reduce or even eliminate your energy bills. This is the key reason why many homeowners and farmers have opted to install solar energy systems.
7. **Solar Technology Offers a Return on Investment:** Both solar electricity and solar hot water systems are capable of offering a return on investment (ROI) over their lifetime.
8. **The Sun has many other Natural Benefits:** The sun supports life on earth in many different ways. It helps to grow our crops in order to provide food, supports the habitats of many living creatures and also provides light and warmth, helping us to see and stay warm.

AIM AND OBJECTIVES:

- To create energy awareness & scientific interest among the school students.
- To encourage and aware the students and people for solar energy.
- Promoting the use of renewable energy resources in rural area.

The Departmental staffs and students are actively involving in solar energy popularization/awareness in nearby villages, schools and in NSS Camp. The Department of Physics every year arrange the field visit to "PV Grid Tied Solar Rooftop System" which was installed in our college Campus.
